And more......

How you profit from the SAP PI Mapping Toolkit

✓ Faster implementation using graphical and Java mapping
✓ Multiple toolkit instances possible within one mapping
✓ Integration of SAP Log API (Trace Object)
✓ Full integration of the dynamic configuration
✓ Test functions within Eclipse or Altova XMLSpy
✓ A standard within the department
✓ Quality insurance through BPO
✓ SAP release compatibility
✓ Innovative and future oriented toolkit
✓ Tools and applications without the need for development
✓ Less development effort necessary

*The SAP PI Mapping Toolkit can be extended with customer specific functionality.*

SAP PI Mapping Toolkit
Powered by SAP Netweaver PI
Save time and money on Graphical, Java and XSL based mapping.

Tools for the «Process Integrator»

How can the SAP PI Toolkit be used:

Graphical Mapping
Within the graphical mapping our toolkit is available as user defined functions making the mapping process easier.

Java Mapping
Within the java mapping our toolkit can easily be declared and used **without in-dept knowhow of the Java Language**.

XSL
Within the XSL mapping our toolkit is available for instant use.

Included with our SAP PI mapping toolkit, you will find more examples on how to use the functions and methods of the toolkit. Included is also our online documentation and wiki site under:
http://service.bpo.ch/help *available to all our customers.*
